Innovation in masterplanning

Problem of overcrowding

Negative impact.
With consequences for:

- the well being of prisoners and staff
- the compliance of basic needs
- the possibilities of organizing activities
- the quality of the infrastructure/building

(1)Maximizing the application of electronic monitoring

(2)Master plan

(1) Electronic Monitoring (EM)

Impact on overcrowding on three levels:

- Execution of sentences
  - Front door and back door
- Pre-trial detention (since 1 Jan 2014)
- Autonomous sanction (as part of Belgian Penal Code, Law of 7 Feb 2014, not yet in force)

(2) Master plan

- The most important factor was the building of 4 new prisons

Guiding objectives:

- A secure prison with a centralized organisation
- Modern institution and new technics
- New view of detention traject of inmates
- Attention for care and guidance
- Attention for ecology and technology
- Quality of architecture and design
- Attention for environmental implantation and design
- In some new prisons: possibilies for judicial activities

Guiding objectives (2):

- Facilities for inmates wich allow a new approach on how to treat inmates and how to organize a life in a penitantiary context:
  - Shower on cell
  - PrisonCloud
  - Visiting facilities

- Phone on cell
- Focus on work, formation and activities

Challenges:

- Change management
- Different approach is asked from the guardians (formations are not adapted)
- Develop more/different contact with inmates (dynamic security)
- Level of security vs. open living conditions
- Immediate/instant lifestyle and expectations

Intrinsic initiatives to increase the quality of prison life

(1) Act on the principles of prison administration

(2) Prisoncloud

PrisonCloud

Connect to build our future

(1) Act on the principles of prison administration (law)

Regulates the execution of sentences to minimize the negative effects of detention.

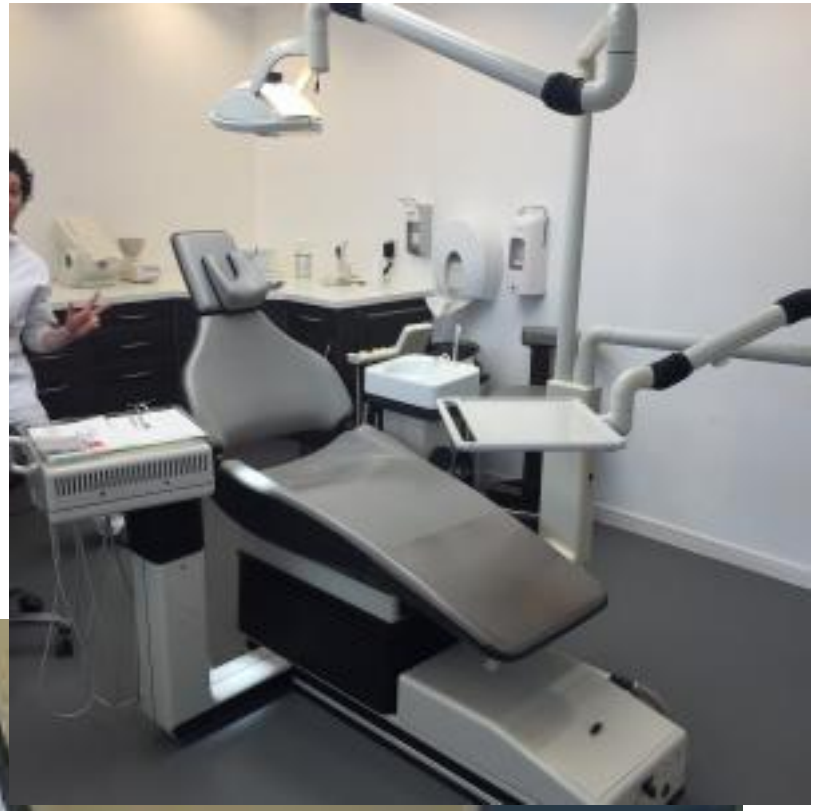
<u>Principles:</u>

- Normalization
- Standardization
- Restorative justice
- Reintegration/rehabilitation
- Consistency in decisions over all prisons

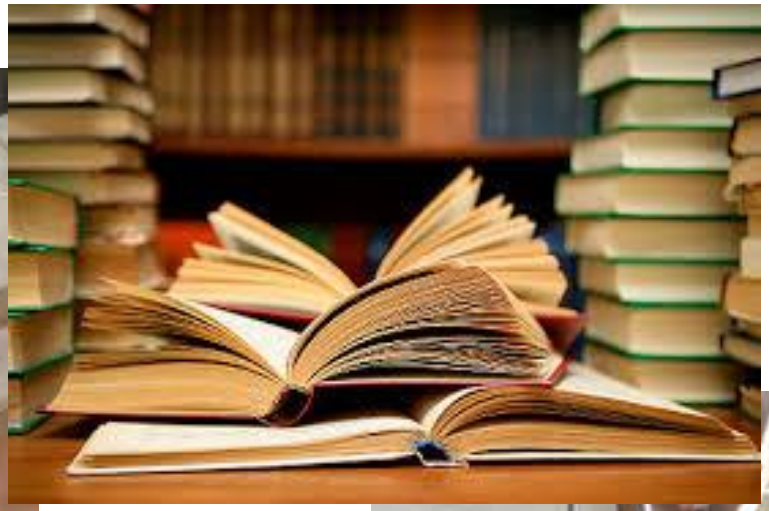
Normalization in practice: visiting possibilities

Normalization in practice: daily phone call

Normalization in practice: daily access to medical care



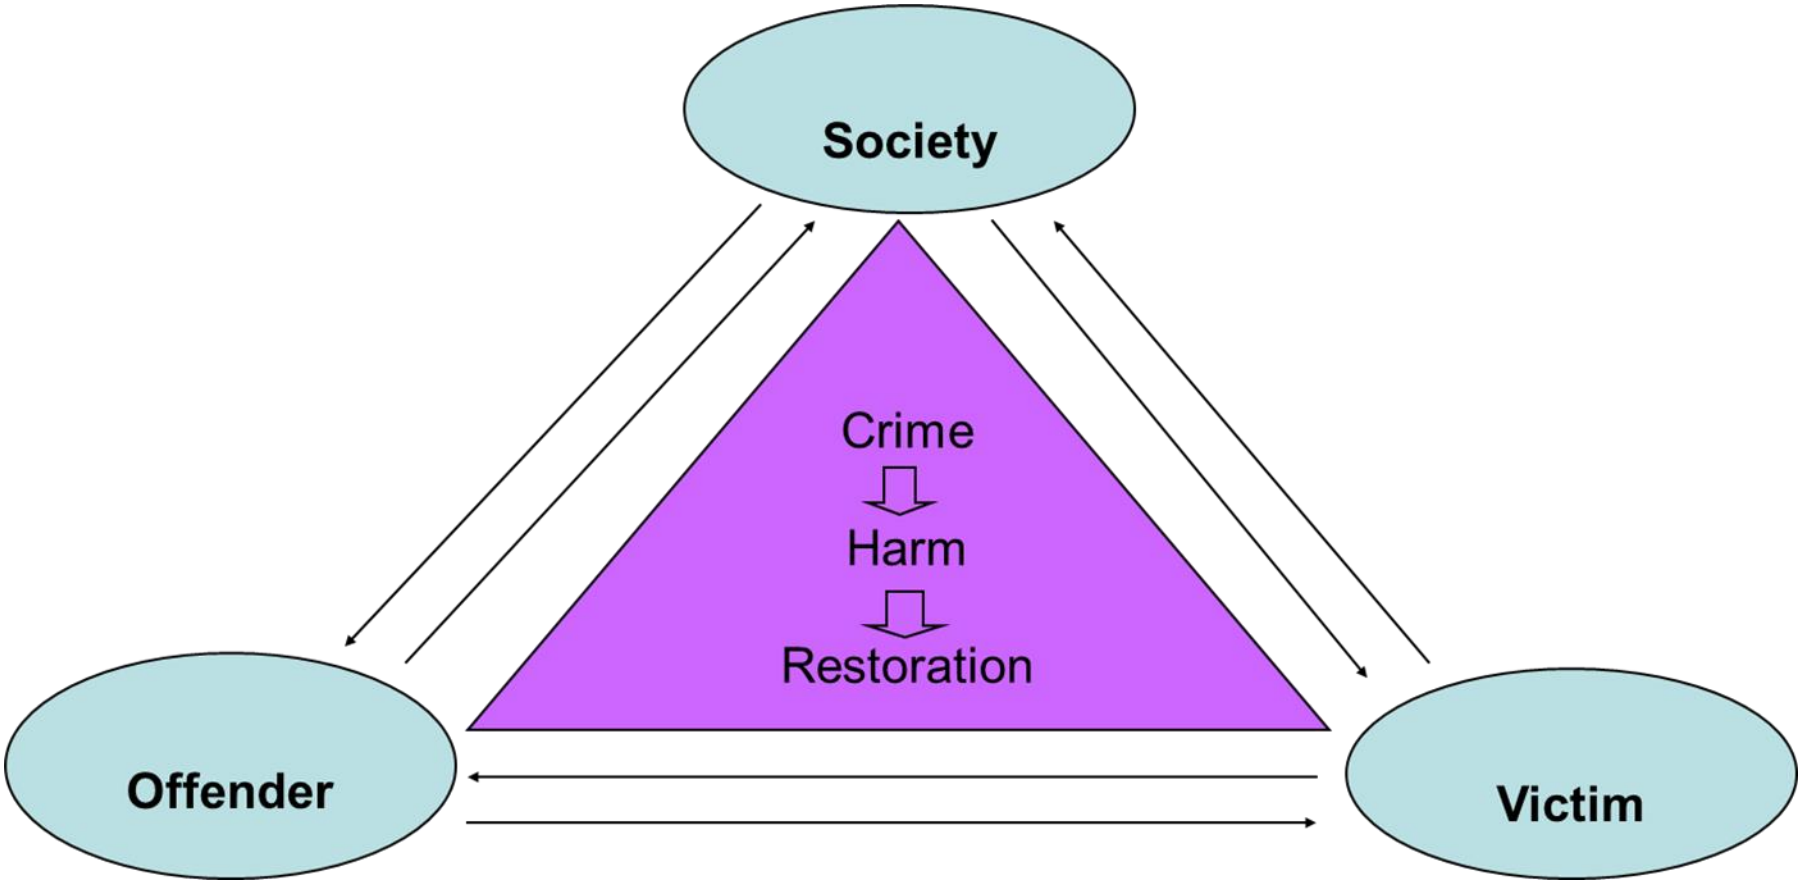
Normalization in practice: vocational training and other courses



Normalization in practice: working facilities

Normalization in practice: access to sport and other leisure activities

Restorative justice: a prison reality



Restorative activities in practice

- Victim-offender mediation
- Payment of damages to victim
- Voluntary work as part of the restorative justice fund initiative
- Workshops on the consequences of victimisation
- Discussion groups on restoration and responsibility
- Intensive training ‘Victim in Focus’
- Creative workshops, art projects, etc

Challenges for the future

- Integrated collaboration between EuroPris member States
- Exchange best practices
- Out of the box thinking versus normalization
- Accountability and responsability for the inmates
- Offendermanagement system as a driver for internal/external security
- Introducing digital workflow
- Access to technology
