In order to continue our collaborations and experience sharing, we do need your help, as we want to have the most relevant topics for the next ICT workshop in April/May 2014.

*Please choose **4** of the suggested topics below, which you find most interesting/problematic/challenging.*

Collaboration is key and your feedback is important to ensure the topics reflect the priority areas of European Prison Agencies.

Please send your suggestions to rodicapopa@europris.org

Plenary session workshop 'ICT in Prisons'
Suggestions for future cooperation in the ICT sector

- create a **platform** for:
- the exchange of ideas
- for defining what functionalities are needed
- for jointly approaching suppliers
- for comparing prices offered by suppliers
- for informing each other about on-going and upcoming tenders and for sharing tender documents

- joint development of **common data standards and technical standards**

- use of **biometrics & RFID tagging**

- **new technologies** in prisons for:
- detecting drugs in prisons
- Intelligent Camera and CCTV systems
- Communication technology (DECT, Walky-talky, Localization, etc...)

- use of **e-mail by prisoners**

- evaluation of **user interfaces** & ergonomic aspects

- use of **mobile devices** in prison

- ways to achieve **cost reductions**

- annual ICT workshop with participation of more countries, especially also the large countries such as France and Germany; total number of people should stay at around 50 persons in order to keep the working group size at a practical level

- create small working groups; each of them responsible for the preparation of one item for the annual workshop

- involving a supplier presentation should ideally be combined with a prison visit where the technology has been applied and can be seen in operation and feedback can be obtained from the users of the technology
