# Outline: Paving the way for effective collaborative model for identification, support and prevention of domestic violence in Lithuania

- **Context:** Lack of cooperation between police and other stakeholders
- **Opportunities:** assistance is necessary not only for victims but also for perpetrators, e. g., to participate in the programmes addressing violent behaviour
- **Challenges:** Although programmes for violent offenders are provided in probation system, much more opportunities of social assistance for violent offenders involving other stakeholders are needed

- The project aims to assess the mechanisms of identification of violence, existing assistance, preventive measures for victims of domestic violence, **the peculiarities of work with perpetrators**, and the creation of a model for cooperation between police and other interested institutions.
- The collaborative model will include a practical algorithm - schemes and guidelines for work with domestic violence cases.
- The dissemination of the study has been carried out by organizing a workshop for stakeholder organizations (**police officers, prosecutors, social support centres, NGOs working in the area of domestic violence**), and final discussion that will present a model for cooperation, discuss practical implementation issues and share methodological material.
