

**REPUBLIC OF TURKEY
MINISTRY OF JUSTICE
GENERAL DIRECTORATE OF PRISONS AND DETENTION
HOUSES**

PENAL INSTITUTIONS DESIGNS

Types of the Penal Institutions

Fundamentally there are types of penal institutions in Turkey;

- Closed prisons:
 - ✓ A, B, C, D, E, F, H, K, L, M, R, S, T, high security, women,*
- Open prisons
- Juvenile detentions houses

**There is no relation between designs and the alphabets*

Closed Prisons

- All of them are reinforced concrete constructions,
- The most important thing is security,
- CCTV surveillance system at the entire prison except private living areas.
- Entrance controlled by biometric systems and X-rays etc.
- There are social and education parts prepare the prisoners to the life after prison.

Open Prisons

- Built for the adoption to the social life,
- Prisoners work in various jobs,
- Also they gain new abilities that can use and earn money later completing their life in prison.
- Security is less important than closed ones.
- Generally located near the closed prisons.

Current State

- Children between 0-6 years old can stay with their mothers.
- Required milk, baby foots, diaper and healt services are provided.
- Children can use open and closed sport areas with other prisoners.
- All the facilities can be used by the children.

Current State

- Some negatives occur on the children and mother-child relation in these conditions.
 - The mother's inability to take care of her child enough .
 - Lack of a large playroom and garden.
 - Limited interaction between the other children
 - Limited personel devolepment due to the improper conditions.

Current State

Current State

Current State

Project Purpose

- To eliminate the negative effects of prisons on children and to contribute to their personal development.
