

# **RELEASE DATA**

SPANISH GENERAL ADMINISTRATION

# GENERAL RULES

- According to Spanish Legislation, under specific conditions, a prison sentence can be executed in open regime.
- There are different ways of open regime. The most common, consists on the obligation of inmates to stay in an open prison at least 8 hours (usually the night).
- Other ways of open regime are implemented outside prison facilities: mainly, electronic monitoring in inmate's home and others, like therapeutic communities.

# APRIL DATA

- ***Inmates in open regime: 6810***

- In prison facilities: 1279

- During the crisis, this inmates are allowed to go outside the prison to essential working activities as the rest of the population.

- ***Outside prison facilities: 5531***

- Electronic monitoring: 5031

- Other kind of monitoring: 220

- Therapeutic communities and others: 280

# EVOLUTION

## Electronic Monitoring

# STRATEGY

- The main release measure has consisted on implementing the open regime under **electronic monitoring** outside prison facilities.
- Two objectives achieve:
  - Reducing the number of inmates sharing prison facilities and the risk of illness.
  - Facilitating, if possible, that inmates share the isolation time with their families.
