Restoring family visits - when and under which conditions

Estonia
Estonian Prison Service does not plan to restore family visits in the next couple of weeks.

Norway
New rules for prison visits will be presented mid-May

Luxembourg
From the 11th of May 2020 onwards, the Luxembourgish Prison Administration proceeds to a gradual opening of the visits. Visits are being limited to 30 mins/visit, 2 persons above the age of 16/visit, max. 25 visits/week. Visits take place in secured individual rooms where visitors and detainees are separated by glass. All visitors must disinfect their hands and wear masks. Furthermore, the options provided to have conversations over Skype are maintained and still available. So detainees (condemned and defendants under the community regime) still have the possibility to make use of the videochat facilities in order to get in touch with their families.

Northern Ireland
The Northern Ireland Prison Service (NIPS) have introduced a range of measures in response to the risks presented by COVID-19, this included the suspension of ‘in person’ visits to prisoners. These measures were introduced having considered the situation in detail and Government advice. To help people in our care to stay in contact with their family and friends during the suspension of visits, NIPS launched virtual online visits from 13 April. NIPS reviewed the measures in place on 24 April and decided that the suspension of visits would remain in place subject to a further review on or by 22 May. NIPS review of its measures (including the ongoing suspension of visits) will take cognisance of the prevailing operational and community context and Government advice.

Israel
No plans to open the visits

Sweden
No steps have been taken to go back to normal regimes and all restrictions that have been put in place are still valid, for example no visits (legal visits and clergy exceptions) and no leaves. However, in addition to free calls nationally (international calls are half the normal price) there are now tests ongoing with providing inmates contact with their children by using tablets. All decisions/actions taken to limit the spread of Covid-19 are under constant evaluation,

*pre-trial detainees that came to prison with COVID-19 infection

**25 of the 61 are recovered and back at work; **on average 50 per day in quarantine

*5 staff members have recovered

*6 staff members recovered

*62 total, 15 already recovered; **264 total, 168 already recovered

*45 already recovered - total of 61; **24 already recovered, total of 75

*12 have fully recovered from COVID-19 **on sick leave for positive Covid-19, symptoms, and other illnesses (7% prison&probation)

*2 of them are hospitalized; **184 of them penitentiary police / 8 administrative staff; 11 hospitalised

*tested negative staff 91 and inmates 42 **6 recovered

*6 from prison, 3 from probation ~ 1 of the three is recovered

*14 in prisons, of which 7 are recovered, 1 deceased and one released from prison; 6 in forensic care of which 5 are recovered

*1 infected staff member that is in quarantine

*5 already recovered

*prisoners quarantined upon their arrival are not calculated. Every new detainee stays in isolation for 7 days before being transferred to regular sections.

*pre-trial detainee that went directly from court to civil hospital

*the two is recovered and back t work

*1 prisoner is recovered

*one staff member was quarantined immediately after returning from travelling abroad and has been on sick-leave since then (never entered a prison), **all newly admitted prisoners are isolated for reasons of precaution
Latvia

Regarding visits there is no set date for when this will happen. The cessation of special measures related to the Covid-19 virus will happen gradually, and in line with national health policies. In Latvia, the plan is to restore family visits for prisoners before 9 June (for now, the emergency situation in Latvia has been announced for this date).

Lithuania

Lithuanian Prison Department plans to restore family visits from 1 June, provided the lockdown is lifted. The conditions shall be set up in line with the national health policy.

Denmark

On the 18th May a limited reopening of visits will be introduced. Prisoners with underaged children will be granted one visit of up to two children and one accompanying adult pr. 14 days. Prisoners in the age between 15-17 years will be granted one visit of up to two close relations pr. 14 days. The visits will be held in line with health guidelines and requirements regarding physical surroundings and cleaning. The Danish Prison and Probation Service is continuously assessing when to further open up visits in prisons.

France

In France, the deconfinement started gradually from May 11. Visits are limited to one visitor (adult) per inmate. The provision of laundry is not possible so far (these precautionary measures will be reassessed on June 2, second step of the national deconfinement). Contacts between inmates and their visitor must strictly respect the barrier measures: washing hands before the visit, respect a sufficient distance, not allowance of any physical contact (kissing, hugging, etc.). Wearing of a personal mask is compulsory for all visitors from the entrance of the establishment, in order to maintain a maximum level of protection against the virus in detention. Wearing of a mask by detainees is also compulsory (provided by the administration). Each visit cabin is cleaned between two visits (which has an impact on the reduction of numbers of available: sometimes: 50% operational, 50% cleaned, and then a switch to allow time for cleaning).

Italy

A decree issued on 10 May 2020 establishes that since next 19 May until 30 June 2020, prisoners are still allowed and encouraged to have video calls with their family members or telephone calls with them, even beyond the limits set by the Penitentiary Law and Regulations in ordinary situations. The prison Governor, in consultation with the Regional Director of the Penitentiary Administration of his territory and with the highest healthcare authority of the Region, shall establish the maximum number of visits per person which can be received by inmates. Each inmate is entitled to receive at least one visit per month with at least one visitor. The close cooperation at local level with the healthcare agencies is crucial, because the healthcare authorities indicate the criteria to follow in order to ensure the social distancing in the premises dedicated to the family visits. This will allow to set the number of visits per day which can be carried out in every visiting room in every prison in Italy.

Finland

All sports and exercise rooms and saunas in prisons will be opened as of 1.6.2020. If the prison unit has its own sauna, its use can be started immediately. The maximum number of persons in sports halls in the same time is 10 persons. The cleaning and ventilation of premises must be ensured after every instance of use. The use of prison libraries will normalize from 1.6, but the libraries will be visited by prison unit and maximum of 10 prisoners at a time. Remote lending will continue. Preparations are being made for the start of prison visits. At first, the visits would only concern the next of kin and the children of the prisoner. The opening of meetings requires special arrangements in prisons, as the occupational safety of staff is very important. The protection during the visits is ensured and respiratory masks are provided to the visitors. Skype meetings continue in prisons as usual. The expansion of work activities will begin as of 1.6.2020. The consequences of the easing of restrictions will be assessed and, if, for example, cases of Covid-19 occur in prisons, RISE will be prepared to decide on new restrictions. At the moment, there's no confirmed Covid-19 cases in Finnish prisons. The Preparedness group of RISE is working on a proposal for gradual removal of restrictions with prison directors. At the same time, the infectious status of the virus in society and the effects of alleviation in prisons will be assessed.

Cyprus

The way forward for visits is to gradually allow up to 2-3 visits per inmate monthly, for those relatives/friends who meet the entrance criteria set out by the Department. Special vinyl/plastic desk shields will be placed in all visiting rooms in order for the inmates and visitors not to come into physical contact. Moreover, as previously mentioned, the visitors will enter the Department, only if the entrance criteria are met and the relevant formal declaration is signed by the relative/friend. Moreover, the current physical distancing guidelines provided by the World Health Organisation, will be met, as regards the number of visitors/inmates present in each visiting room.

Austria

Since 27 April we have a new regulation. This means that the restricted visitation of inmates will be possible again from 11.5. Several visitors may not be allowed to visit a prisoner at the same time, except for a visitor under 14 years of age and his adult companion.

Spain

The plan is to recover the ordinary penitentiary activity (visits, inmates outgoings, transfers, therapeutic activities), depending on the location of the prison and following the general sanitary instructions. Nevertheless, there are some specific rules. For example, visits are restarting, but limited to two people and avoiding physical contact.

Hungary

The Hungarian Prison Service used to have tasers, but not any more. We had a project as well to introduce tasers into our organization, but it is on hold at the moment. We are interested in the practices, so if you could share any further information it would be highly appreciated.

Spain

not used

Belgium

not used

Luxembourg

In Luxembourg, we don’t use tasers in prisons. In general, our regular surveillance staff is not equipped with any kind of weapon.

Northern Ireland

Norway

not used

Slovenia

not used

Germany, Hessen

not used

England/Wales

We do not use TASSER® or any other form of electroshock weapons in HMPPS

Lithuania

In Lithuania tasers were introduced approx. 2 years ago

Latvia

The electroshock devices “Taser 26” are at the disposal of the Latvian Prison administration officials of prisons (except the women prison and correctional institutions for juveniles). These persons may use the devices only in an emergency and in special cases.
The use of tasers is regulated by § 43 b of the Act no. 4/2001 Coll. on the Corps of Prison and Court Guard, as follows: § 43 b Special coercive means (1) Special coercive means are:

a) temporarily incapacitating means, b) special throwing and striking means, if they do not have the nature of a weapon. (2) The prison officer is authorized to use special coercive means (i.e. tasers) in order to: a) ensure his/her safety and the safety of other person against an unlawful attack, if the attack still does not drop after warning and the attack is immediately approaching, lasting or according to all signs will continue, b) prevent from riot, ruffle, intentional damage of property or other abusive behaviour by which an established order or public order is violated, c) bring in accused, sentenced or other person, if he/she resists actively, d) prevent from violent entry of unauthorized persons into protected buildings, buildings of court, building of prosecution or other premises where entry is forbidden, e) prevent from the activities of unmanned aircraft. As of today, the Corps has tasers in seven prison facilities (3 tasers per prison facility). Remark: in Slovakia there are totally 18 prison facilities. In the course of this year, the Corps has been planning to purchase tasers to all prison facilities in Slovakia, as well as to the Training Centre of the Corps.
