Portugal	0	7					
Ireland	0*	45**	27***				*6 awaiting testing **another 30 awaiting testing ***288 cleared from isolation

**Restoring family visits - when and under which conditions**

Estonia	Estonian Prison Service does not plan to restore family visits in the next couple of weeks.
Norway	New rules for prison visits will be presented mid-May.
Luxembourg	From the 11th of Mai 2020 onwards, the Luxemburgish Prison Administration proceeds to a gradual opening of the visits. Visits are being limited to 30 mins/visit, 2 persons above the age of 16/visit, max. 25 visits/week. Visits take place in secured individual rooms where visitors and detainees are separated by glass. All visitors must disinfect their hands and wear masks. Furthermore, the options provided to have conversations over Skype are being maintained and still available. So detainees (condemned and defendants under the community regime) still have the possibility to make use of the videochat facilities in order to get in touch with their families.
Northern Ireland	The Northern Ireland Prison Service (NIPS) have introduced a range of measures in response to the risks presented by COVID-19, this included the suspension of 'in person' visits to prisoners. These measures were introduced having

considered the situation in detail and Government advice. To help people in our care to stay in contact with their family and friends during the suspension of visits, NIPS launched virtual online visits from 13 April. NIPS reviewed the measures in place on 24 April and decided that the suspension of visits would remain in place subject to the a further review on or by 22 May. NIPS review of its measures (including the ongoing suspension of visits) will take cognisance of the prevailing operational and community context and Government advice.

Israel	No plans to open the visits
Sweden	No steps have been taken to go back to normal regimes and all restrictions that have been put in place are still valid, for example no visits (legal visits and clergy exceptions) and no leaves. However, in addition to free calls nationally (international calls are half the normal price) there are now tests ongoing with providing inmates contact with their children by using tablets. All decisions/ actions taken to limit the spread of Covid-19 are under constant evaluation, regarding visits there is no set date for when this will happen. The cessation of special measures related to the Covid-19 virus will happen gradually, and in line with national health policies.
Latvia	In Latvia it is not planned to restore family visits for prisoners before 9 June (for now, the emergency situation in Latvia has been announced by this date).
Lithuania	Lithuanian Prison Department plans to restore family visits from 1 June, provided the lockdown is lifted. The conditions shall be set up in line with the national health policy.
Denmark	On the 18th May a limited reopening of visits will be introduced. Prisoners with underage children will be granted one visit of up to two children and one accompanying adult pr. 14 days. Prisoners in the age between 15-17 years will be granted one visit of up to two close relations pr. 14 days. The visits will be held in line with health guidelines and requirements regarding physical surroundings and cleaning. The Danish Prison and Probation Service is continuously assessing when to further open up visits in prisons.
France	In France, the deconfinement started gradually from May 11. Visits are limited to one visitor (adult) per inmate. The provision of laundry is not possible so far (these precautionary measures will be reassessed on June 2, second step of the national deconfinement). Contacts between inmates and their visitor must strictly respect the barrier measures: washing hands before the visit, respect a sufficient distance, not allowance of any physical contact (kissing, hugging, etc.). Wearing of a personal mask is compulsory for all visitors from the entrance of the establishment, in order to maintain a maximum level of protection against the virus in detention. Wearing of a mask by detainee is also compulsory (provided by the administration). Each visit cabin is cleaned between two visits (which has an impact on the reduction of numbers of available: sometimes: 50% operational, 50% cleaned, and then a switch to allow time for cleaning). Extension to 2 visitors (i.e. including one child) will be assessed for the 2nd step of de-confinement (June 2nd). Possibility given to governors to adapt the location of visits: easier sometimes to organise them in a common but large room (at least for the start). Visitors have to complete a document (same draft for all prisons) acknowledging that they don't have covid symptoms, and that they understand and respect the rules (including sanitary ones) during all the visit: the keep the document with them as we do not have the right to keep "medical" personal information. They have to show their face for ID at the entrance and when leaving the prison. Time is limited to max 1 hour per visit. Plexi separation can be added to separate the visitor and the detainee; but main rule is to have the social distance and the masks. If those plastic/plexi separation are used, they are different from security hygiaphone: they are not fully separating. Marks are put on the floor (adhesive ruban). Outside waiting family rooms (usually ruled by an association) are not opened so far. More staffs are positioned in the visit area to supervise the whole process. So far, the deconfinement is limited to family visits and, for juveniles, compulsory school. Daily outside promenade and outside sport activities (if no contact) are still ongoing. The progressive following measures (activities) are under assessment for a progressive start post 2nd June.
Slovenia	We intend to re-establish visits in Slovenian prison system on Monday, 18th of May. Each prison facility needed to prepare its own protocol for re-establishment of visits. They have to implement standards as provided by the National Institute for Public Health. If there is an option they should provide visits on fresh air, visit through a glass barrier, visit around the table are also allowed (standards NIPH) ... Implementation of these options depend on capacities of each facility.
Italy	A decree issued on 10 May 2020 establishes that since next 19 May until 30 June 2020, prisoners are still allowed and encouraged to have video calls with their family members or telephone calls with them, even beyond the limits set by the Penitentiary Law and Regulations in ordinary situations. The prison Governor, in consultation with the Regional Director of the Penitentiary Administration of his territory and with the highest healthcare authority of the Region, shall establish the maximum number of visits in person which can be received by inmates. Each inmate is entitled to receive at least one visit per month with at least one visitor. The close cooperation at local level with the healthcare agencies is crucial, because the healthcare authorities indicate the criteria to follow in order to ensure the social distancing in the premises dedicated to the family visits. This will allow to set the number of visits per day which can be carried out in every visiting room in every prison in Italy.
Finland	All sports and exercise rooms and saunas in prisons will be opened as of 1.6.2020. If the prison unit has its own sauna, its use can be started immediately. The maximum number of persons in sports halls in the same time is 10 persons. The cleaning and ventilation of premises must be ensured after every instance of use. The use of prison libraries will normalize from 1.6, but the libraries will be visited by prison unit and maximum of 10 prisoners at a time. Remote lending will continue. Preparations are being made for the start of prison visits. At first, the visits would only concern the next of kin and the children of the prisoner. The opening of meetings requires special arrangements in prisons, as the occupational safety of staff is very important. The protection during the visits is ensured and respiratory masks are provided to the visitors. Skype meetings continue in prisons as usual. The expansion of work activities will begin as of 1.6.2020. The consequences of the easing of restrictions will be assessed and, if, for example, cases of Covid-19 occur in prisons, RISE will be prepared to decide on new restrictions. At the moment, there's no confirmed Covid-19 cases in Finnish prisons. The Preparedness group of RISE is working on a proposal for gradual removal of restrictions with prison directors. At the same time, the infectious status of the virus in society and the effects of alleviation in prisons will be monitored.
Cyprus	The way forward for visits, is to gradually allow up to 2-3 visits per inmate monthly, for those relatives/friends who meet the entrance criteria set out by the Department. Special vinyl/plastic desk shields will be placed in all visiting rooms in order for the inmates and visitors not to come into physical contact. Moreover, as previously mentioned, the visitors will enter the Department, only if the entrance criteria are met and the relevant formal declaration is signed by the relative/friend. Moreover, the current physical distancing guidelines provided by the World Health Organisation, will be met, as regards the number of visitors/inmates present in each visiting room.
Austria	Since 27 April we have a new regulation. This means that the restricted visitation of inmates will be possible again from 11.5. Several visitors may not be allowed to visit a prisoner at the same time, except for a visitor under 14 years of age and his adult companion.
Spain	The plan is to recover the ordinary penitentiary activity (visits, inmates outgoings, transfers, therapeutic activities), depending on the location of the prison and following the general sanitary instructions. Nevertheless, there are some specific rules. For example, visits are restarting, but limited to two people and avoiding physical contact.
Belgium	Yes, we intend to restore the family visits for inmates, gradually. We start at 25.05.2020. 1 visitor/inmate – once a week. In the first phase, visits will take place in visit rooms with separation device and protection equipment. We will have less tables because we have to guarantee the 1.5 m distance.
Romania	The Romanian Prison System intends to restore the family visits for inmates, gradually, in the near future, depending on the epidemiological Covid-19 evolution at national level. In the first phase, visits will take place in rooms with separation device and protection equipment.
Czech Republic	Since today, the emergency state in the Czech Republic is no longer in force. Family visits to prisons are going to commence (in a limited manner) this weekend (on Saturday 23 May). Currently, visiting forms (including instructions and

restrictions for the visits) are being distributed and collected. The visits are not going to be realized within the "normal" "pre-Covid-19" framework. There are going to be some restrictions in force: One prisoner can only receive one visitor; Visitors have to sign a statement that they do not have to be in home quarantine, they have not suffered from Covid-19 infection (or, if they have had, the last 2 test have been negative) etc.; In visiting rooms, tables are going to be equipped with plastic partitions; Visitors and prisoners (and staff in general) must wear personal protective equipment (face masks); No refreshments during visits; Thorough disinfection of the visiting rooms after each visit round.
