Conjugal (intimate) visits are not carried out in Slovakia. We have only standard prison visits of close persons (at least 2 hours/month) with presence of the prison staff. Their procedure during the State of Emergency is stated above.

Regardless of Covid-19, there are no conjugal visits in Luxembourg. (cf. question from Lithuania)

There is no difference in restrictions and actions, taken regarding the prevention of Covid-19 between detention centers and regular prisons. The procedure of admission and course of the restriction of personal liberty is according to anti-epidemic measures the same for pre-trial detainees and convicts. There are no specific restrictions for detainees.

The conjugal visits have been resumed in May 2020. Up to 16.05.2020 there are no restrictions. Prisons and detention centers are open for visits. All visitors must respect the anti-epidemic rules, wearing a face mask and tested by obligatory thermometry. A virtual visit via Skype is an option for the inmates and detainees.
