In addition: 132 inmates have been tested with PCR tests. 8 of them have been tested positive on Covid-19. 130 of them have been already recovered. 2 of the rest 5 positive inmates are hospitalized patients in prison’s hospitals; the other 2 are detainees and their measures have been changed from deprivation of liberty to the measure mandatory to sign in in front of police officer; the last one is a prisoner, who sentence has been suspended by the prosecutor after a proposal from the chief of the prison.

In terms of staff members, 268 staff members have been tested with PCR tests. 92 of them have been tested positive on Covid-19. 41 have been already recovered.

No COVID infections in Cyprus prisons (inmates or staff).

Czech Republic: 11 infected inmates (10 convicts and 1 pre-trial detainees); 144 staff members (71 uniformed staff members, 43 civilian employees).

Denmark: 3 inmates have tested positive. All three have recovered.

Estonia: 2 of the 5 infected staff members are teachers from the secondary school that provide education in prison.

Finland: Prisoners: (1 total cumulative number of COVID-19 cases: 1); Staff: (0 total cumulative number of COVID-19 cases: 0).

Georgia: No COVID infections in Georgia prisons (inmates or staff).

Hungary: Prisoners: (1 total cumulative number of COVID-19 cases: 1); Staff: (0 total cumulative number of COVID-19 cases: 0).

Ireland: Prisoners: (1 total cumulative number of COVID-19 cases: 1); Staff: (0 total cumulative number of COVID-19 cases: 8).

Israel: 397 inmates, 347 staff members have been tested with PCR tests. 8 of them have been tested positive on Covid-19. 3 of them have been already recovered.

Italy: 6 inmates infected as of 12 August 2020; 4 inmates dead (of whom 2 died after being released from prison to “house arrest”); 268 staff members have been tested with PCR tests. 92 of them have been tested positive on Covid-19. 41 have been already recovered.

Latvia: 24 inmates infected as of 12 August 2020; 4 inmates dead (of whom 2 died after being released from prison to “house arrest”); 10 staff members have been tested with PCR tests. 4 of them have been tested positive on Covid-19. 1 has been already recovered.

Lithuania: 11 inmates infected (1 in an open prison, 1 in a correction house); 14 inmates dead (of whom 12 died after being released from prison to “house arrest”); 268 staff members have been tested with PCR tests. 92 of them have been tested positive on Covid-19. 41 have been already recovered.

Luxembourg: Number in Custody: 1,772.

Malta: 1 prisoner still not recovered.

Moldova: 3 inmates infected as of 12 August 2020; 0 inmates dead; 10 staff members have been tested with PCR tests. 1 has been tested positive on Covid-19.

Netherlands: Current number as of the 4th of November; 32 confirmed C-19 infections among detainees within the prison administration; 1 confirmed C-19 infections among detainees within forensic care; 0 confirmed C-19 infection among detainees within a correctional facility for juvenile offenders; 11 confirmed C-19 infections among detainees within detention centres. Total: 32 confirmed C-19 infections among detainees.

Northern Ireland: The latest statistics from the Norwegian Correctional Service are from 29 October. The numbers of inmates/convicted persons infected with Covid 19 are 17. Among staff members, 16 are infected with Covid 19.

Norway: The numbers of inmates/convicted persons infected with Covid 19 are 17. Among staff members, 16 are infected with Covid 19.

Poland: In the Romanian prison system, since the beginning of the epidemic, there have been 148 cases reported among prison staff and 0 cases reported among prison population, until the 31st August.

Romania: In the Romanian prison system, since the beginning of the epidemic, there have been 148 cases reported among prison staff and 0 cases reported among prison population, until the 31st August.

Slovakia: The numbers for Prison Administration of the Republic of Slovenia are following (13 October); 7 staff members positive on COVID-19; 0 inmates positive on COVID-19.

Slovenia: Current number as of the 4th of November.

Spain: 203 inmates, 199 staff members have been tested with PCR tests. 183 of them have been tested positive on Covid-19. 137 have been already recovered.
In Catalonia recently we have had two outbreaks in two of the prisons, hence to date, the figures since March 2020 are as follows:

- Inmates: 105 active positive cases and 202 already recovered (total 307)
- Staff: 77 active positive cases and 209 already recovered (total 286)

Currently, family visits are still possible in all prisons except for the two in which the outbreak has been located. Family visits are taking place with all security measures (temperature measurement, half of the visiting members allowed, facemask, hand wash, 1.5 m distance from the inmate and in a room with ventilation).

In the two prisons with the outbreak, families can still visit but in a room with a partition glass.

Since March we have had 160 infected inmates. All of whom are healthy now so as of today 2nd November we have 0 infected inmates.

Bulgaria

General Directorate Execution of Sentences organized the conduction of staff trainings in order to support the mental and psychosocial well-being of the staff throughout the COVID-19 pandemic. The trainings have been managed by psychologist, social worker and a member from the medical staff in the form of explanatory conversations.

The role of the medical staff in the training is to clarify and present to the prison staff the nature of disease, the ways of spreading, the symptoms and the prevention measures of Covid-19.

The role of the psychologist in these explanatory conversations is to show to the staff how to protect their mental health in extreme situations. The psychologists provide main points, as follow:

- Decrease to the minimum the level of watching television, reading and listening to news about the spreading of the disease. All these will help you to decrease the stress level. Trust only reliable sources, such as web site of World Health Organisation or Regional Health Inspectorates.
- Take care of yourself and support people around you;
- Respect the work of your colleagues;
- Take care of your health. It is as important as taking care of your mental health.
- Think about your skills and strategies, which have been useful in the past. Use them now to control your feelings during the Covid-19 pandemic.
- Try to live healthy with appropriate diet, enough sleeping, physical activities and social contact with the members of your family at home, with your friends by social media, telephone and mails.
- If you feel that the bad mood is more than usual, get in touch with medical staff or psychologist.

Focus on activities which keep your body and brain busy and in contact with reality.

Czech Republic

So far the Prison Service of the Czech Republic has not prepared and particular training related to Covid-19 pandemic issues.

England and Wales

Please see some resources HMPPS would like to share in response to The Italian Prison Service:

Estonia

Estonian Prison Service did not organise any special training courses related to COVID-19. Prisons held meetings for C-19 action planning and lessons learned analysis. And prison medical department instructed prison staff how to use PPE.

Finland

We have not organized training activities related to COVID-19. We have a wide range of written instructions for the management of COVID-19.

France

Outdoor walk are maintained but in small number.

Outdoor sports activities or in the gymnasium are kept in small group.

No more access to fitness and weight rooms.

School for minors in small group are maintained. For adults, it’s distancing school.

No more professional training.

No more cultural activities.

The work in the general service is maintained as well as the workshops, in the respect of the sanitary rules.

Israel

Regarding the question from Italy – we did not have any organized training or special activities related to Covid-19.

We did post a lot of information for staff and inmates about the ways to behave in order to reduce the risk of getting sick such as: the impotence of wearing mask, keep distance, wash hands etc.

We are doing inquiry and debriefing foe every case of inmate / staff infection and sharing the information and the conclusion through all the staff

Latvia

In Latvian Prison Administration, training activities in presence related to COVID-19 management are not organized. Remotely, employees have been introduced with a special instruction on COVID-19 infection risks and relevant personal hygiene and preventive measures to be observed.

Also, staff follows the Administration Order “On Ensuring Epidemiological Safety in Imprisonment Places of the Latvian Prison Administration” issued on 14 October 2020 by the Head of Administration, and the state recommendations on epidemiological safety.

Netherlands

We are not organizing any training activities related to COVID-19.

Northern Ireland

The only training Northern Ireland Prison Service has carried out in relation to COVID 19 is remote training to teams of track and trace officers at each establishment. NIPS have issued plenty of guidance, mostly based on World Health Organisation and Public Health Agency guidance. Provision of healthcare for those infected is a matter for our colleagues in the South Eastern Health & Social Care Trust. We work closely with those colleagues as strategic and local levels to ensure that we do everything we can to keep infection rates down, and treat appropriately those who become infected.

Slovakia

No special training activity has been carried out. An internal regulation has been processed and is being updated according to the development of the epidemiologic situation.

Several leaflets of the Central Health Office were distributed to all prisons.

Spain-Catalonia

It has not been necessary.

Visit from the inmates.

• Try to live healthy with appropriate diet, enough sleeping, physical activities and social contact with the members of you family at home, with your friends by social media, telephone and mails.

Northern Ireland

NIPS initially ceased in person visits at the start of the pandemic and brought in video visits which proved very successful. NIPS did reintroduce in person visits once restrictions were eased by the Government. They were offered on a significantly reduced capacity, with measures in place to ensure social distancing and hand hygiene took place. Currently NIPS have again suspended in person visits due to restrictions put in place by the local Government and should these change, NIPS will again review their position. Video visits continue to be offered.
