es.

| Belgium | In response to your question, I can tell you that this issue is also a concern to us. |
|------------------|--|
| | A task force has also been set up at federal level in which the federated entities are also represented, given Belgium's institutional structure and their role in t Our wish is that the prisons will soon be included in the vaccination plan, especially in the wave of vaccination of the communities. We do not yet have a decis |
| | At the level of the administration, we have developed priorities between institutions according to the vulnerability of the prison population: institutions with o is being drawn up for a first institution, which will also serve as a test for subsequent institutions. |
| | We do not yet have a date, depending on the delivery of the vaccines, which is not clear at the moment and we are awaiting a decision from the task force. |
| Luxembourg | 1) The National Administration of Penitentiaries has applied the measures issued at national level through the Vaccination Strategy against COVID-19 in Roman |
| | Stage I: Health and social workers - public and private system: a) Hospital and ambulatory staff (i.e. medical-health, auxiliary, administrative, security, surveillance and other categories of staff); b) Emergency medical staff d) Staff working in laboratories, pharmacies and other health workers; e) Dental staff; f) Resident doctors and medical students profile; g) Paramedics and oth Staff providing medical and social care at home; j) Staff working in public health services, i.e. National Institute of Public Health, Public Health Directorates; k) Staff uransfusion centers; m) Personnel involved in vaccination campaigns. Stage II: |
| | a) Population at risk i. Adults over 65 years of age; ii. Persons with chronic diseases, regardless of age, according to the indications of the vaccines used.b) Staff working in key, ess institutions subordinated to them; ii. Defense, public order, national security and judicial authority staff; iii. Staff in the vital economic sector: - Processing, d purification, transport and distribution plants;- Electricity production, transmission and distribution;- Gas production, transmission and distribution units;- Liqu producing, transporting and distributing; - Transport of persons and goods; - Railway junctions, civil and military airports, essential ports; - Communications, na nurseries; v. Postal and courier staff; vi. Religious cults staff; vii. Media staff engaged in activities with high risk of exposure to SARS COV2 infection such as: re Stage III: General population |
| | a) Adult population; b) Pediatric population, depending on the epidemiological developments and the characteristics of the vaccines approved for use in case of persons under 18 thus, the medical staff working in the prison system benefited from vaccination against SARS-CoV-2, with priority, in stage I. The rest of the prison staff were with the prison staff were with regard to inmates, they are vaccinated in stage III, exception for the persons over 65 years of age or with chronic diseases (vulnerable). Persons over 65 years of age or with chronic diseases (vulnerable). |
| Luxembourg | 2) The criteria according to which inmates are considered vulnerable and may be classified in vaccination stage II are the age over 65 years and history with th |
