Probation Service are as follow;

• • •	ven to the vaccination of prisoners and staff members within the prison administration/service? eria (physical condition) are detainees considered as "vulnerable"?
3)In terms of vaccination	n, what priority is given by your government to the prison population compared to other vulnerable populations?
England and Wales	Whilst a more robust model for vaccination of staff and prisoners is under consideration here at HMPPS, currently both groups are being vaccinated i https://www.gov.uk/government/publications/covid-19-vaccination-care-home-and-healthcare-settings-posters/covid-19-vaccination-first-phase-pr
Czech Republic	According to the National C19 vaccination strategy, prison staff members fall into the second priority group (the first group being people over the age other members of the so-called critical infrastructure. Within the prison service, there are further priority subgroups - such as staff working at C19 un specialists (educators, psychologists), etc. Prisoners as a whole are not set as a separate priority group. Respecting the "equivalence of care", they shall be vaccinated on the same terms as the health condition.
Denmark	1) Prison guards, healthcare staff and staff in critical functions will be prioritized.
	2)Age
	Certain chronic diseases and persons with weakened immune systems Overweight - persons with a BMI over 35 or with a BMI over 30 and one or more chronic diseases. Pregnant women
	3)Inmates will be vaccinated with the remaining population if they are not considered vulnerable.
	The Danish Health Authority has determined that vaccinations is given in the following order: 1. Residents in nursing homes, etc.
	2. Decople aged \geq 65 years who receive both personal care and practical assistance.
	3. $∎$ eople aged ≥ 85 years.
	4. Personnel in healthcare, elderly care and selected parts of the social sector who are at particular risk of infection or who has been identified as perfected persons with conditions and diseases that result in a significantly increased risk of severe illness from COVID-19.
	6. Selected relatives of persons at significantly increased risk of severe illness from COVID-19 or relatives who are indispensable as carers. 7. Deople aged 80-84.
	8. Deople aged 75-79.
	9. Beople aged 65-74.
	10. Deople under 65 years of age who have conditions and diseases that put them at risk of severe illness from COVID-19.
	11.Staff in other sectors critical to the functioning of society. 12.The remaining population, for example prioritized according to age.
	Prison guards, healthcare staff and staff in critical functions are in category 11. Other categories of staff and inmates in category 12.
Spain	regarding the vaccination of inmates and workers in our prisons: The Sub directorate General of Penitentiary Health holds weekly meetings on COVID measures and vaccination with the Ministry of Health and all here
	• Paccination of our inmates and prison workers is included in the National COVID-19 Vaccination Plan like all Spaniards. We have agreed that each Au general population.
	According to the prioritizations in Spain:
	•In the 1st phase, all health professionals in all prisons are already being vaccinated just as health professionals in hospitals or health centres are bein or currently, our prison health staff is already being vaccinated and we hope to finish in a few weeks.
	one are vaccinating with our prison nurses or public health nurses.
	on this stage, the elderly homes and their staff are also vaccinated.
France	 In the 2nd phase, prison workers will be vaccinated for being essential staff (as well as firefighters, police, etc.). Also inmates given their vulnerability The government strategy is in the process of being deployed. As it stands, the guidelines of the Ministry of Solidarity and Health with regard to detain
	In concrete terms, since January 18, 2021, vaccinations have been gradually implemented for prisoners over 75 years old and / or at risk of comorbidi
	A national doctrine regarding public detainees is being finalized by the Ministry of Solidarity and Health to be sent to regional health agencies and he
	This involves specifying the challenges of logistics (including delivery of doses), assessment of needs by site, coordination with the prison authorities
Lithuania	1) Prison heathcare staff have already received vaccination. Prisoners will be vaccinated in line with the priorities set forth by the National health aut
	2)According to what criteria (physical condition) are detainees considered as "vulnerable"? All prisoners are considered vulnerable as they are exposed to health risks.
	3) Prisoners shall be vaccinated on the same terms as the general vulnerable population depending on which priority group they fall under.
Belgium	In response to your question, I can tell you that this issue is also a concern to us.
	A task force has also been set up at federal level in which the federated entities are also represented, given Belgium's institutional structure and their Our wish is that the prisons will soon be included in the vaccination plan, especially in the wave of vaccination of the communities. We do not yet have
	At the level of the administration, we have developed priorities between institutions according to the vulnerability of the prison population: institution is being drawn up for a first institution, which will also serve as a test for subsequent institutions.
	We do not yet have a date, depending on the delivery of the vaccines, which is not clear at the moment and we are awaiting a decision from the task

d in line with the priorities set in the community. This can be found on the GOV.UK website: priority-groups

Luxembourg	1) The National Administration of Penitentiaries has applied the measures issued at national level through the Vaccination Strategy against COVID-19 Stage I: Health and social workers - public and private system:
	 a) Hospital and ambulatory staff (i.e. medical-health, auxiliary, administrative, security, surveillance and other categories of staff); b) Emergency medical of Staff working in laboratories, pharmacies and other health workers; c) Dental staff; f) Resident doctors and medical students profile; g) Paramedical Staff providing medical and social care at home; j) Staff working in public health services, i.e. National Institute of Public Health, Public Health Director transfusion centers; m) Personnel involved in vaccination campaigns. Stage II: a) Population at risk
	 i. Adults over 65 years of age; ii. Persons with chronic diseases, regardless of age, according to the indications of the vaccines used.b) Staff working ir institutions subordinated to them; ii. Defense, public order, national security and judicial authority staff; iii. Staff in the vital economic sector: - Proceeding to the indication, transport and distribution plants;- Electricity production, transmission and distribution;- Gas production, transmission and distribution up producing, transporting and distributing; - Transport of persons and goods; - Railway junctions, civil and military airports, essential ports; - Communic nurseries; v. Postal and courier staff; vi. Religious cults staff; vii. Media staff engaged in activities with high risk of exposure to SARS COV2 infection so Stage III: General population a) Adult population;
	b) Pediatric population, depending on the epidemiological developments and the characteristics of the vaccines approved for use in case of persons of Thus, the medical staff working in the prison system benefited from vaccination against SARS-CoV-2, with priority, in stage I. The rest of the prison sta With regard to inmates, they are vaccinated in stage III, exception for the persons over 65 years of age or with chronic diseases (vulnerable). Persons
Luxembourg	 2) The criteria according to which inmates are considered vulnerable and may be classified in vaccination stage II are the age over 65 years and histor diabetes; obesity; metabolic, including congenital diseases; cardio-vascular disease; kidney disease;
	 oncological disease; lung disease; neurological conditions, including Down syndrome; moderate/severe liver disease; autoimmune diseases; HIV/AIDS.
Luxembourg	3) In view of the above, the prison population has been assimilated to the general population and it will benefit from the SARS-CoV-2 vaccine in the la
Northern Ireland	Vaccination policy in Northern Ireland is based on the recommendations and advice provided by the independent Joint Committee on Vaccination an The most recent JCVI advice on prioritisation of the vaccine was published on 30 December 2020 and the ranking of priorities is a combination of clinic relevant guidance is provided below: https://www.gov.uk/government/publications/priority-groups-for-coronavirus-covid-19-vaccination-advice-from-the-jcvi-30-december-2020/joint-c priority-groups-advice-on-30-december-2020.
	Vaccinations in prison settings will be in line with the JCVI recommendations and the first prisoners who meet these criteria have been vaccinated.
Italy	Questions n. 1 & 3 – The vaccination of the prison population and of the Penitentiary Administration staff follows the priorities indicated by the Italia Order of priority: • Bealthcare workers and social-healthcare workers
	 Staff and residents in long-term care facilities for elderly people People aged 80 and over People aged between 60 and 79 People with at least one chronic comorbidity, immunodeficiency, or weakness, independent from their age Social groups at higher risk of serious illness or death
	 Bigh priority teachers and school staff Remaining teachers and school staff Workers of essential services and of settings at risk Persons living and working in prisons and other confined settings.
	 ■ Beople with moderate comorbidity ■ Beople and population
	Question n.2 - The prison population considered as vulnerable (intended as people suffering from conditions which, due to a pre-existing damage to forms of COVID-19) complies with the characteristics below, similar to those ones relevant to the general population.
	See below table
1	Italy

Cystic fibrosis	Patients to be considered by default as highly weak due to the respiratory implications typical of that disease.
Kidney failure/kidney disease	Patients undergoing dialysis
Auto-immune diseases – primary immunodeficiencis	Persons with lungs seriously compromised or marked immunodeficiency and persons living with them. Autoimmune diseases associated with immun
Hepatic diseases	Patients diagnosed with hepatic cirrhosis
Cerebrovascular diseases	Persons who suffered from an ischemic accident of cerebral hemorrhage which affected the neurological and cognitive autonomy of the patients. Per
Onco-hematic diseases and hemoglobin diseases	Onco-hematic patients undergoing treatments with immunosuppressive drugs, myelosuppressive drugs or who stopped treatment less than six montain and from sickle cell anemia.
Down syndrome	All the patients with Down syndrome, due to their partial immunocompetence and since they often suffer from congenital cardiopathy, are considered
Transplant of a solid organ and of haematopoietic stem cells (on a waiting list and who underwent a haematopoietic transplant three months after the transplant and within one year from the procedure)	Persons who underwent a transplant of a solid or haematopoietic organ and suffer from a chronic graft-versus-host disease under immunosuppressiv
Serious obesity	Patients with a BMI over 35.
Israel	The Israel Prison Service got priority for the vaccine from the government. We were second in the priority staff and inmate. As of Feb 2 : Staff vaccination 93% received the first shot. 44% received the second shot. Inmates vaccination: 74% received the first shot.
Slovakia	Vaccination policy in Slovakia is given by the Regulation of the Ministry of Health that stipulates the order of precedens. Prison population as such is r and Act on Prison Sentence Execution: inmates have the right to the health care in the extent available for the general population. Medical staff is in the first phase of the vaccination that is over at the moment, thus all prison medical staff who wanted to be vaccinated, has already
Bulgaria	In regards of your request concerning the vaccine strategy and the vaccination of prisoners and staff members, below you will find short description of According to the strategy there are 5 stages of vaccination, as follow: 1st stage covers a group of persons (first line medical staff in hospitals, dentists, pharmacists etc.) with high risk of infection and also the risk that the 2nd stage covers staff of social institutions, pedagogical specialists and staff of mink farms. 3rd stage covers staff from different areas responsible for essential public activities. At this stage are included the staff members from the prisons, prisoners and detention centers who have expressed a desire to get vaccination. 4th stage are included elderly people and over 65 years of age and persons with concomitant diseases. 5th stage are included vulnerable groups and the criteria is high risk of infection because of their way of life. According to the strategy prisoners are included vulnerable groups and the criteria is high risk of infection because of their way of life. According to the strategy prisoners are included vulnerable groups and the criteria is high risk of infection because of their way of life.
-	
Estonia	 In Estonian Prison Service priority is given to medical personnel and prison staff providing escort between housing and medical units. Next priority support structure staff As a whole, Estonian Prison Service follows the Estonian National Vaccine Plan which gives priority to: Health care workers and people working in headiagnoses. According to the same criteria stated in the Estonian National Vaccine Plan. In Estonia vaccination is implemented following the National Vaccination Plan. There is no special regulation or priority given to the prison population

Updated informatio	on about the visits in prison in defferent countries. Are visitations suspended?
Austria	Visits of inmates within the meaning of Section 93 StVG (concerning general visits by family, friends, etc.) are permitted again since February 8, 2021. A maximum of two persons is permitted to visit an inmate at the same time. In any case, care must be taken and appropriate preparatory organization who do not live in the same household is to be kept. The visitors are also to be made aware of the other protective and hygienic measures (FFP-2 mass inmates, the prison management may, in consultation with the General Directorate, suspend visits of inmates within the meaning of Section 93 StVG
Estonia	In Estonia long-term family visits are cancelled since Oct 2020. Short-term visits in secured individual rooms where visitors and detainees are separate checked with a no-touch thermometer and in case of cold-like symptoms is denied entry.
France	The visits are still going on in France
Finland	Visits are prohibited based on the epidemiological situation on of the area the prison is located in. Finland is using 3-level model (basic phase, acceler Additionally prisons can limit the visits based on the national situation as whole, i.e the current risks of B.1.1.7 spread.
	However The Agency just updated the covid-19 guidelines and the new guidelines underline that even if the visits are banned there should be an extr or 14 days quarantine after the visit.
Lithuania	In Lithuania the visits in prisons are still suspended
Bulgaria	the prison visits in Bulgarian prisons, please be informed that at the moment the prisons and detention centers are open for visits. All visitors must re of the prison or detention center obligatory thermometry is conducted and hands sanitizer is provided. Before and after each visit the premises should
