England and Wales	Unfortunately we will only be able to share the published Safety in Custody statistics (link below)									
	https://www.gov.uk/government/collections/safety-in-custody-statistics									
	This provides data on self-inflicted deaths	up to December 2020, and for self-harm up to Sep	ptember 2020. The next quarterly data will	be published at the end of April.						
	OVID-19 situation influence the prison populons (e.g. suspension of prison visits and similarity	and the control of th	elves more frequently? Or alternatively, h	ve you recorded an increase in the numbers of suicides/attempts for suicide due to the COVID-19 situation and related restrictions						
Estonia	No									
Belgium	·	• • •	<u> </u>	e to speak of a substantial increase despite the containment measures.						
Finland	Covid-19 has not greatly impacted self-harm or suicide rates in Finnish prisons. There is no significant increase in figures. Reasons for prisoners self-harm or suicide in Finland remain highly focused on current individuals personal issues or are related to the crime committed or sentence given or about to be given. Our statistical classification between attempted suicide and self-harm is a bit unclear and therefore we did not give exact numbers on attempts									
Sweden	Unfortunately, the SPPS do not have any s	tatistics about attempts for suicide related to the	pandemic. We measure the number of self	harming incidents in total, not taking into account the intention of the acting. No suicides committed during 2021.						
Catalonia	The number of suicides during the Covid-19 time has been similar to that in 2019 whereas the attempts of suicide have decreased. A total increase in numbers has been recorded with regard to non-severe self-harm incidents. This aspect could reveal a possible influence of the restrictive measures that have been in place in prisons during Covid-19, however, the increasing trends have not been recorded in all of the prisons, thus this assumption is not generally applicable.									
Latvia	The Latvian Prison Administration considers that, at the moment, COVID-19 situation has not influenced prisoners to harm themselves.									
Netherlands	Within the institutions of the Dutch Custodial Institutions Agency we do not see an increase in the suicide attempts. Furthermore, no general claim can be made regarding a relationship between de suicide attempts and the situation regarding Covid-19.									
Northern Ireland	In Northern Ireland we have not seen an increase in self-harm during the COVID-19 pandemic and the number of people supported under our Supporting People at Risk Evolution approach has remained low.									
Bulgaria		nclusion that there is a connection between the su	•							
		uspended now or oganised with special security								
Spain	In the jurisdiction of the General Directorate of Spain, visits depend on the specific sanitary situation of each prison. Nevertheless, from a general perspective, it can be said that visits are taking place again under specific measures.									
Ireland	Please be advised that currently due to Covid 19 and level 5 restrictions in place in Ireland, there are no physical visits, prisoner/family visits are conducted through Videolink.									
Norway	In Norway the infection rate is currently very high, and many prisons have inmates infected with Covid-19. Because of this, in many prisons it is not possible to allow for visits, at the same time as there might be regional differences.									
Estonia	In Estonia long-term family visits are still cancelled. Short-term visits in secured individual rooms where visitors and detainees are separated by glass continue as normal, while following all hygiene and disinfection requirements.									
Latvia	In Latvian prisons visits are still suspended									
Netherlands	The detainees can receive one adult visitor	r at a time. During the visit they are seperated by	glass							
Finland	In Finland prison visits are restricted in tho	ose regions where the COVID-19 epidemic is in the	e acceleration stage or in the spreading stag	e. However, we try to arrange visits of the children of the prisoners in a corona safe way if only possible						
Lithuania	In Lithuania contactless prison visits are allowed since 6 March (max 2 visitors, up to 1 hr). PPE and maintaining 2 m distance is mandatory.									
Northern Ireland	The Northern Ireland Prison Service have s	suspended in person visits at this time and this de	cision is kept under regular review. Video v	isits continue to be offered.						
Belgium	Since 1 February, children between the ag	Visits in Belgian prisons are still possible on condition that the necessary measures are taken.  Since 1 February, children between the ages of 12 and 15 are again admitted to the table visit and the regular visitor can change after four weeks. The changes are important for the well-being and family contacts of the detainees.  The current prevention and protection measures in place in prisons (e.g. no physical contact, respect for cleanliness rules, etc.) ensure that these changes to the visiting rules can be implemented in a safe manner.								
	· ·	or (≥ 16 years) is allowed for a minimum of four we 6 years) is allowed, this does not always have to b		s the detainee who has to request this.						
England and Wales	Following instructions for people to stay at	t home, protect the NHS and save lives, introduce	d as a result of the COVID-19 pandemic, HN	IPPS prison visits are temporarily cancelled.
