			Prisoners:
			Current cases: 179 (total cumulative number of cases during the epidemic: 2615 among which total recovered : 2353, deaths: 3)
			Chaff.
			Staff :  Current cases: 346 (total cumulative number of cases during the epidemic: 4165 among which total recovered: 3757, deaths: 2)
Georgia	0	0	On behalf of Georgian Penitentiary System let me kindly inform that till December, 2020 there was no single COVID-19 cases confirmed in Georgian PEs among convicts. Since December 31, 2020, Special Penitentiary
Georgia	ľ		Service of Georgia (SPS) has been actively testing inmates with PCR tests in all PEs (13 in total). As the result of intensive testing last weeks, none of the COVID-19 cases has been confirmed.
			To date, 22752 PCR tests have been undertaken in PEs.
			In total, 194 cases of COVID-19 has been confirmed within all PEs and to date this number is reduced to zero.
			In order to keep such results, preventive measures within PEs is continued and PCR tests are undertaken in each PE once a month.
Hungary	95	504	Current COVID-19 cases as of 22/12/2020:
3 6 7			Inmates - 95
			Prison staff – 504
			COVID-19 cases since the beginning of the pandemic:
			Inmates - 517
			Prison staff –1208
			COVID-19 related deaths among inmates and prison staff since the beginning of the pandemic – 2 inmates
Ireland	133	344	number of infected prisoners/staff as of May 13th 2021. Number in Custody: 3,806
Israel	51	19	Here is an update from IPS – Israel Prison Service,
			Staff:
			No confirmed staff.
			1 in quarantine.
			Inmates:
			11 confirmed.
			No quarantine.

Romania	•	er of inmates who have already got vaccinated is 2	2.456 and the vaccination process continues						
	Regarding the prison staff, we don't keep s	such evidences.							

Luxembourg	In Luxembourg, all detainees had the possibility to be vaccinated on a voluntary basis by the end of March/beginning of April. 208 detainees which equals approximately 1/3 of the prison population (as of the 31st of March) have been vaccinated.
	After a sudden increase of Covid-19 infections within the closed prison in Schrassig, the government decided mid-April on short notice that prison officers were to be prioritized for vaccination. In consequence, 249 prison officers chose to be vaccinated.
	Medical and psychiatric personnel in the prisons had already been vaccinated, as they are part of the health sector.
Catalonia	The vaccination process started at the beginning of the year for both, inmates and professionals, on a voluntary basis.
	Currently around 70% of the inmates have been vaccinated.
	The 6 active cases among inmates are mostly newly arrived ones and have contracted the virus before entering the prison.
Slovakia	Number of persons who received at least one dose of vaccine:
	Inmates – 303 (current total number of inmates is 10 317)  Prison staff 2545 (surrent total number of prison staff including sixil amplexes is 5487)
	Prison staff – 2545 (current total number of prison staff, including civil employees is 5487) In accordance with the National Strategy for Vaccination against COVID-19 in the Slovak Republic, our government established the prioritization of the groups of citizens which may receive a vaccine in the given time period. Inoculation of inmates also follows this strategy.
	From 29 April 2021, the last vaccination phase was launched in Slovakia (e.g. 1st phase was for health care staff, crisis infrastructure; 2nd phase was for persons over the age of 85, etc.), which means that the persons who are over 16 years can register to receive the vaccine.
	Until 28 April 2021, only the persons over 40 year could register. The vaccination is voluntary.
	Low number of vaccinated inmates is caused by a relatively high rate of inmates who were diagnosed with COVID-19 and therefore they cannot be included in the vaccination procedure yet. Another reason is that the vaccination procedure of inmates is in accordance with
	the National Strategy for Vaccination that is valid for whole population (overview of inmates by age - 64 inmates over 70 years; 1559 inmates from the age of 51 to 70; the rest is under the age of 50).
Estonia	Vaccinated (with at least one dose)
	Prison staff 887
	Inmates 260
Italy	Total number of vaccinations in the Italian Penitentiary system

	The vaccination compaign in our pricens goes about consistently with the availability of vaccines at national level
Bulgaria	current status of the vaccination in the Bulgarian prisons:
	Phases 3 and 4 of the National Vaccination Plan for Covid-19 in Bulgaria are currently underway. These phases include employees involved in the maintenance of basic public life activities and persons over the age of 65, as well as persons with concomitant chronic diseases.  According to the National Vaccination Plan against Covid-19 in the Republic of Bulgaria, prisoners/detainees, as a vulnerable group, are included in phase 5 of the plan due to the high epidemiological risk of infection related to living conditions and lifestyle.
	After the start of phase 5 and the completion of phase 3 of the National Vaccination Plan by Covid-19 in Bulgaria, we will be able to provide you with detailed statistics on vaccinated staff and prisoners.
Czech Republic	within the Czech Prison Service, the current vaccination figures are as follows:
- Lepasiic	Staff members (total count: 11 300)
	3253 received both doses
	Inmates (total count: 19 000)
	3 received both doses, 264 are waiting for the second dose
	please note that inmates are not considered a "preferential group" by the Government's Vaccination Strategy. In line with the principle of normality and equality of care, the same rules apply to inmate population as to the general society-population — therefore, at the
	moment, only the inmates over the age of 70 y.o. are eligible to be vaccinated.
	Please bear in mind that the figures presented do not include individuals (staff members) who were inoculated outside the prison system (i.e. by their GP etc.). We do not have the particular data available at the moment.
	In least wear in mind and the rightes presented do not meladad jotan members, and were included outside the prison system then by their or etc.), we do not have the particular data available at the moments.
